SUMMARY

DevOps Engineer who replaces fragile, manually-run infrastructure with secure, automated, production-grade platforms — proven across 10+ multi-cloud environments for **Fortune 500 clients (TD Bank, CBA, Snowflake)**. Backed by Helm-based deployments across 8 chart versions and 42+ production components spanning **AWS EKS, AWS ROSA, Azure AKS**, and Google Cloud Platform; end-to-end **Azure Workload Identity** eliminating static secrets across 24 federated credentials; and serverless autoscaling that cuts idle compute cost.

TECHNICAL SKILLS

- **Languages:** Python, Bash, SQL, Groovy
- **Cloud & Kubernetes:** AWS (EKS, EC2, S3), Azure (AKS, Key Vault), GCP, OpenShift (ROSA), Helm, CRDs, RBAC
- **CI/CD & Testing:** Jenkins, GitHub Actions, Playwright, Allure
- **Security:** AWS IAM, OIDC, Azure Workload Identity
- **Data:** PostgreSQL, Kafka, Snowflake, Databricks, Redis, MinIO

EXPERIENCE

H2O.ai | DevOps Engineer — QA & Certification

Oct 2023 — Present

- Built and run 10+ production environments across **AWS**, Azure, and GCP for Fortune 500 banking clients (TD Bank), spanning **AWS EKS**, OpenShift ROSA, and Azure AKS
- Authored 25+ Terraform resource types provisioning full stacks: **AWS ROSA HCP** clusters, **Lambda** autoscaling, **IAM** roles, **S3**, **Secrets Manager**, plus Azure AKS, networking, PostgreSQL, and 13 managed identities per environment
- Built serverless cluster autoscaling on **AWS Lambda + EventBridge**, scaling ROSA machine pools on schedule and cutting idle compute cost
- Implemented Azure Workload Identity end-to-end: 24 federated credentials across 11 namespaces, enabling passwordless PostgreSQL and storage auth with zero static secrets
- Built CI/CD pipelines running E2E and connector tests on every PR across Jenkins and **GitHub Actions (AWS OIDC)**; authored 187 commits to a Python test suite of 1,600+ test functions across 18 modules
- Wrote a custom pytest plugin (hac-playwright) handling Keycloak, Okta, and OTP auth for UI automation; built 198 Playwright specs covering every app and connector
- Authored 34+ technical docs including an 812-line H2O AI Cloud debugging guide; published runbooks to Confluence for the wider team

H2O.ai | Software Engineer (ML Platform & Release)

March 2021 — Oct 2023

- Designed CI/CD and release pipelines for microservices-based ML applications serving CBA, TD Bank, and Snowflake, increasing release velocity by 30%
- Built monitoring and observability using Grafana and SQL across **AWS**, Azure, and GCP, achieving 100% uptime through proactive alerting
- Delivered 15+ production releases across distributed teams in 5 countries (Japan, Prague, Slovakia, USA, India) with full documentation and runbooks

H2O.ai | Full Stack & DevOps Engineer

March 2020 — March 2021

- Automated CI/CD frameworks for ML model deployment using Jenkins, Docker, and Kubernetes
- Delivered integration workflows for 3 enterprise applications within a 3-week deadline, building a reusable framework still in use today
- Improved deployment efficiency by 50%. Started as the most junior engineer. Left a framework behind.

EDUCATION

Indian Institute of Information Technology, Pune

Bachelor of Technology (B.Tech)

2016 — 2020

SELECTED ENGINEERING WINS

- Researched and shipped **AWS** network isolation for a private ROSA cluster after evaluating 4 approaches (Network Firewall, EgressFirewall, AdminNetworkPolicy, Security Groups)
- Led production PostgreSQL 15→18 upgrade across environments — full pg_dumpall backup/restore with a documented rollback checklist, zero data loss

CERTIFICATIONS

Claude Certified Architect — Foundations (CCA-F), Anthropic

In Progress, 2026

Anthropic's first technical certification (Claude Partner Network) — agentic architecture, Claude Code workflows, prompt engineering, MCP integration, context management.

BEYOND THE TERMINAL

- Part-time surfer. Once certified course in Varkala, and I am already scheming my way back. I think I'm a natural!
- Certified cinephile. Tell me your mood — I'll recommend a movie you'll love.
- I dare you to beat me in go-karting, and don't even try me on karaoke. I'm very competitive.
